Dear Friends,

It is our immense pleasure to invite you to the 8th 'INDIA LIVE', organized by the **Interventional Cardiology Foundation of India (ICFI)**, to be held from **March 2nd to 4th 2017 (Thursday - Saturday)**.

Since its inception in 2010, India Live has grown year after year. The unique educational content, the stimulating live transmissions, the engrossing case based discussion with renowned national and international faculty, the academic integration of regional thought leaders and practical real life in cath lab learnings have been the USP of this course. This year, we add on a profound emphasis on "Regional Trials and Presentations" to encourage seminal research in this region.

INDIA LIVE 2017 will have 30 live case demonstrations from internationally renowned operators from 11 live case sites from India and abroad. Targeted didactic presentations on various contemporary topics on cardiovascular and structural heart diseases will be delivered by thought leaders during this three day extravaganza. Selected complex intervention cases with educative features will be discussed during the sessions as another highlight of the meeting.

Participants will be able to showcase their research and complex cases and will be able to have breakout sessions to discuss with experts PCI of CTO, BRS strategies, TAVR, PFO closure and leadless pacemaker implants etc.

The 'Fellows' in training and younger generation of cardiologists would benefit from a very 'practical' cath lab practice based "**Fellows Course**" on **March 1st, 2017 (Wednesday)** with lectures from the experienced masters.

We hope that you will cherish the stimulating scientific program and invigorating social networking programme. Come, witness and discuss cutting edge research in Interventional Cardiology with leading experts in this field from the world. We aim to make the INDIA LIVE 2017 a most memorable event for you all.

Looking forward to welcoming you in New Delhi.

When it comes to
treating stenosed vessels...

HAVING NOTHING CAN MEAN EVERYTHING

Absorb GT1 is a bioresorbable vascular scaffold that
dissolves between 2 and 3 years, leaving behind
nothing* but a restored vessel—resulting in
renewed possibilities for the patient.

- REPAIRS stenosed vessels¹
- RESTORES vessel function²
- RENEWS vessel wall structure²

MEDEx

Medical **Expert** Advisory
Support for Complex
Coronary Cases

MEDEx Program

Sometimes during complex cases, even the most experienced operator warrants the need of a reassuring second opinion. MEDEx channels this process systematically through the convenience of a phone/laptop within a comfortable time frame. This results in assuring better patient outcomes.

Salient features of **MEDEx**

Connect an Interventional Cardiologist with a panel of experts

Provide a structured strategy as second opinion for complex PCI

Facilitate better patient outcome as a results of expert consultation
